# *Flitterman Collection*

For more than 40 years, Karen Flitterman has been creating custom, hand-made and hand-loomed woven goods for the hospitality and high end residential design industries.

Every piece from the Flitterman Collection is a one-of-a-kind work of art. Using nearly any material, Karen creates luxurious indoor rugs, outdoor rugs, woven leather upholstery, wall art, macrame, pillows, blankets, baskets, and much, much more. Her ability to work with a virtually unlimited range of media for almost any application makes her a go-to source for designers with a unique vision or challenging design. If it can be woven, she can do it. Essentially, if you can visualize it in your mind but don't know who could bring your idea to life, Flitterman Collection is the solution. Karen works in close collaboration with her clients to help them realize their vision by offering guidance, providing solutions, and working within their budgets.

All Flitterman Collection pieces are made entirely free of automation, using the same old-world manual weaving tools and techniques that have survived through centuries.

Flitterman Collection manufactures locally in Los Angeles, California for smaller quantity/public space productions, woven leather and woven vinyl, macrame and other wall art, and any materials utilized in her signature patterns. For larger or guestroom orders, hand-tufted or hand-knotted rugs, PET, etc., she produces at her partner factory in India - a partnership that has been successful for decades. Regardless of where a Flitterman piece is produced, it is still manufactured using the same manual techniques.

These pages contain beautiful examples of her work within the world of hospitality. Her work can be found across the globe in 4-star and 5-star hospitality, luxury resorts, restaurants and retail spaces as well as many celebrity homes. No project is too large or too small. Whether it's a single statement macrame piece in a hotel lobby or 300 guestroom rugs, Karen Flitterman's woven artistry elevates any space.
